To the kind attention of our dear Customers

SUBJECT: COMMUNICATION PURSUANT TO ART. 33 OF THE "REACH REGULATION"

Declaration of conformity with the European Regulation on Registration, Authorization and Restriction of Chemicals (REACH - Regulation EC No. 1907/2006).

In relation to the list of SVHC "highly problematic" substances ("Candidate List" - art. 59 of "REACH regulation") periodically updated by ECHA, and in accordance with the obligations required by art. 33 of the legislation in question

we declare the following

our articles do not contain any of the substances classified as SVHC (Substance of Very High Concern), currently included in the latest update of the "Candidate List" and periodically reviewed by ECHA in quantities greater than 0.1% by weight, with the exception of lead steel with which we make some of our articles and for which the notification to the SCIP DATABASE has been sent as they have a maximum lead content (CAS 7439-92-1) of 0.35%.

Items made with lead steels are listed below:

We also inform you that since lead is contained in the metal alloy, exposure to people or the environment under normal conditions of use and disposal can be excluded, which is why there is no obligation to notify the ECHA agency pursuant to Art. 7.3 of the "REACH regulation".

In relation to the requirements of Article 67 of REACH, and the substances subject to restrictions of use referred to in Annex XVII, we declare that our products comply with the restrictions established for lead and its compounds referred to in item no. 63.

STILMA SPA is considered by the REACH legislation to be a "downstream user" and since it does not manufacture / import in quantities equal to or greater than 1 ton per year:

- 1) substances as such or as components of a preparation;
- 2) substances present in an article and intended to be released from that article;

has no obligation to REGISTER them.

Since the list in question is constantly updated, in accordance with Article 33 of the REACH legislation, we declare the constant monitoring of the possible inclusion of new substances in the list and the timely information to our customers in the event that these substances are contained in the products supplied by us.
